## Electronic antitheft kit

Moto Guzzi has developed an inertial antitheft system in accordance with the strictest standards, in cooperation with Metasystem, leader on the market of security systems. The system consists of two boxes: the first is customized with the Moto Guzzi logo and contains a case and two remote controls, while the second contains the wiring, bracket and necessary hardware. It is a solution that makes installation of a secure antitheft system easy and efficient. The system is certified by Thatcham MC1.
